PROFESSIONAL SUMMARY

Data Analyst-track MCA graduate with IEEE-published research and hands-on SQL, Python, Excel, and Power BI experience across enterprise and independent analytics projects. Skilled in building predictive risk models (churn, dissatisfaction), NLP-driven customer insight extraction, revenue-at-risk analyses and marketing ROI dashboards, translating raw data into stakeholder-ready, statistically grounded recommendations.

EDUCATION

Master of Computer Applications — Amrita Vishwa Vidyapeetham (CGPA: 9.04) **Jul 2024 – May 2026**

Bachelor of Computer Applications — University of Calicut (CGPA: 9.09) **Sep 2021 – Mar 2024**

PROJECTS

AI-Powered Customer Support Analytics *(SQL, Python, NLP, DuckDB, Power BI)* **June 2026 – Aug 2026**

- Built an end-to-end customer-support analytics pipeline for 8,469 tickets, engineering a validated DuckDB star schema and an interactive 3-page Power BI dashboard, with sentiment analysis and BERTopic topic modeling surfacing 30 recurring support themes.
- Developed a Gradient Boosting dissatisfaction-risk model reaching 91.4% recall on 2,769 CSAT-observed tickets, generating risk scores across all 8,469 tickets to support proactive customer-service analysis.

SaaS / Subscription Churn Prediction & Analysis *(SQL, Python, Scikit-learn, Power BI, DuckDB)* **Mar 2026 – May 2026**

- Built an end-to-end churn analytics pipeline using SQL, Python/Pandas, and an explainable Scikit-learn Logistic Regression model across 7,043 customers, validating it via calibration, threshold tuning, and coefficient analysis.
- Translated churn probabilities into Expected Monthly Revenue at Risk ($123.24K exposure, 619 Priority-1 customers) and designed a Power BI star-schema dashboard revealing 42.71% churn among month-to-month customers, informing a retention business case.

Marketing Campaign ROI Dashboard *(Python, Power BI, DAX)* **Dec 2025 – Feb 2026**

- Analyzed 200,000+ marketing campaign records using Python (Pandas, NumPy, SciPy) to validate data quality, engineer CTR, and built an interactive 3-page Power BI dashboard on a dimensional star-schema model with DAX.
- Applied descriptive statistics and one-way ANOVA to test channel-level conversion-rate differences ($p = 0.7159$, $\eta^2 \approx 0.0000145$), translating results into an evidence-based recommendation against channel-based budget reallocation.

E-Commerce Sales & Customer Churn Analysis *(PostgreSQL, SQL, Microsoft Excel)* **Sep 2025 – Nov 2025**

- Validated 99K+ orders and 112K+ order-item records to build a reusable Analytical Base Dataset in PostgreSQL, engineering customer-level retention/churn metrics via SQL CTEs, joins, and window functions with a 180-day inactivity-based churn proxy.
- Designed an executive Excel dashboard (PivotTables, XLOOKUP, Conditional Formatting, KPI cards, Slicers) analyzing sales and retention risk; identified 60.49% churn and ~96.95% one-time buyers.

SKILLS

Data & Analysis Tools: SQL (PostgreSQL, DuckDB), Python (Pandas, NumPy, SciPy, Scikit-learn), Excel (PivotTables, XLOOKUP, Power Query), Power BI (DAX), Tableau, Matplotlib

NLP & Predictive Modeling: Sentiment Analysis, BERTopic, Gradient Boosting, Logistic Regression, Feature Engineering, Model Validation

Programming Languages & Tools: Python, SQL, Java, C, HTML, CSS, Git, GitHub, PowerPoint, Word

Business Analysis & Concepts: Statistical Analysis & Hypothesis Testing, Predictive Modeling, Requirements Gathering, User Stories, Agile/Scrum, UAT, Stakeholder Communication, Data Quality, Process Optimization, SDLC, DBMS, OOP

EXPERIENCE

Data & Process Analyst Intern — Orion Innovation **Jan 2026 –Jul 2026**

- Configured SQL-based data bindings and workflow logic on the KPMG Clara platform, translating business requirements into functional, data-driven workflow components.
- Validated data outputs and workflow behavior across country-specific customizations, collaborating with stakeholders to resolve discrepancies.

Data Analytics Job Simulation — Deloitte (Forage) **Apr 2025 – May 2025**

- Analyzed case-based datasets to identify risk indicators and documented findings for stakeholder reporting.

CERTIFICATIONS

- Google Data Analytics Professional Certificate — Google
- Generative AI for Data Analytics — Coursera / IBM

PUBLICATIONS

- "**Explainable Credit Risk Assessment using Graph Neural Networks and Synthetic Data Augmentation**" — IEEE 2026 (co-authored) — DOI: 10.1109/ICIRCA69024.2026.11570516
